

LC Logistics GPS

Global Port Services

Integral solutions to strengthen your operations

We are a Port Operator that has two Bonded Warehouses within the port of greater growth in the country, Lázaro Cárdenas port.

We offer our clients integral solutions in a foreign trade platform that enables them to design services for their logistic needs, reinforcing their operations.

With over 19 years of experience in handling port merchandise and maneuvers, we also have a dock and warehouses for your bulk cargo, unitized, palletized, and containerized.

As warehouse/dock workers of general cargo, we offer rail services in both areas, as well as double-stack intermodal service. We have specialized load/unload equipment, air cranes, railroad and truck scales.

LC Logistics GPS is responsible for handling materials that are part of logistic chains for different industries such as automotive, construction, consumer goods, agriculture, etc.

We also have our subsidiary company, Almacenadora Afirme, which manages a bonded warehouse in Altamira Port.
